

RADIUS VIDEO MANAGEMENT SOFTWARE

Community-Wide Surveillance Network Solution

Collaborate with Law Enforcement to Provide Real-Time Situational Awareness

When paired with special programs offered by law enforcement agencies, RADIUS Video Management Software can streamline emergency response to 911 calls. The open architecture design allows RADIUS to provide response teams with advanced mapping tools and relevant information from cameras across a broad area.

RADIUS is a video management solution from OpenEye that makes it possible to view security footage from multiple cameras, recorders, and locations from a single workstation and remote locations. With RADIUS, dispatchers can review maps and video from cameras in close proximity to a crime or disaster from hundreds of locations. By connecting their selected cameras to a centralized RADIUS solution, businesses can play a role in the safety of their communities.

SOLUTIONS

- | | | |
|--------------------------------|-----------------------------------|----------------------------------|
| » Video management software | » View live video | » Increase situational awareness |
| » Remote access | » View maps with camera locations | » Improve officer safety |
| » Multiple location monitoring | » Decrease incident response time | » Improve public safety |

OPENEYE IN ACTION

Albuquerque Police Use RADIUS for City-Wide Video Network

The Albuquerque Real Time Crime Center serves as an informational hub, providing police officers with critical information to officers before responding to an emergency.

The APD needed a Video Management System (VMS) flexible enough to connect with public traffic cameras and existing video surveillance systems in local businesses to create a city-wide video network.

OpenEye's RADIUS provided the solution. With RADIUS, the Albuquerque Police Department can access video feeds from multiple sites simultaneously. RADIUS also made it cost-effective for businesses to easily connect to the network, no matter what system they currently have deployed.

"OpenEye is a company that worked with us to meet our needs from end to end," said Real Time Crime Center Director, TJ Wilham.

RADIUS VIDEO MANAGEMENT SOFTWARE

Community-Wide Surveillance Network Solution

RADIUS Features

»	Monitor multiple sites from a single workstation
»	View live video from several different cameras, recorders, and locations with a single workstation
»	Integrate with ArcGIS or similar programs to provide advanced mapping tools
»	Assess the situation and provide positive identification thanks to high-quality OpenEye video
»	Use multiple monitors to view live video and maps from multiple locations simultaneously
»	Increase situational awareness by relaying information from central dispatch to responding officers
»	Increase safety for responding officers and the public at large

Benefits of Collaboration

»	Be a part of the community-wide video network
»	Help improve your community's quality of life
»	Use the same Video Management Software as law enforcement

Be a Part of the Solution

You can be a part of a smart policing solution like the one used by the Real Time Crime Center in Albuquerque. RADIUS-based systems require certain OpenEye products.

»	Connect seamlessly using existing OpenEye video solutions - OR -
»	Upgrade your current surveillance to an OpenEye video solution - OR -
»	Add an OpenEye Gateway Server to your existing video solution

About OpenEye

OpenEye is a leading developer of software solutions for physical security, loss prevention, and business intelligence. With a commitment to creating innovative tools, OpenEye helps business partners to deploy and maintain our solutions efficiently and effectively.

OpenEye is dedicated to Heroic Customer Service and complete customer satisfaction. By encouraging employees to do whatever it takes, OpenEye provides the exceptional service customers deserve. To further prove its commitment to customer service, OpenEye offers 24/7 technical support,* advanced replacement, and exceptional warranties.
