The Cloud Video Platform

POS Connect

Discover The Future Of Video Loss Prevention

POS Connect for OWS marries transactional data from a business's point-of-sale system with video verification to help reduce shrink and gain insights into operations. It allows users to create custom POS searches and view associated video to identify costly problems of fraud, operator error, or poor customer experiences, so they can be corrected. Export video and transaction information to the cloud where it can be shared via password-protected links with internal and external users for increased collaboration and chain of custody.

- POS Transaction Search
- Video Export with Receipt Overlay
- Share POS Video with Other Users
- Alert on Voids, Refunds, Overrides
- Real Time Alerts on POS Exceptions
- Push and Email Notifications
- Licensed Per Terminal
- Cloud Based for Easy Access
- Tablet & Mobile Friendly
- Supports Cloud & LAN POS Systems
